

PayPal Problems?

The most common problem experienced when clicking on the donate button is related to "cookie" settings on your computers privacy settings. There are two ways around this issue:

1. Change the privacy setting on your computer to "low"

- Click on the Tools tab on your tool bar.
- Go to "Internet Options"
- Click the "Privacy" tab
- Use the sliding bar to change the settings to "low" and then click "Apply" or "Ok"

2. Change the privacy settings on your computer to allow "PayPal"

- Click on the Tools tab on your tool bar.
- Go to "Internet Options"
- Click the "Privacy" tab
- Click on "Sites" tab
- Under web address: enter **www.paypal.com** and click "Allow" then click "Ok" when that window disappears click "Ok" again and your done.

Thanks again for making the effort to make a donation.
